4. Read the text about maintenance and fill the gaps with the words from the list. (10pts)

trouble, service provider, fixing, failures, routine, demand, supply chain, violations, out of order, overhaul

Maintenance, repair, and operations (MRO) involves 1) _____ any sort of mechanical, plumbing, or electrical device should it become 2) _____ or broken (known as repair, unscheduled, or casualty maintenance). It also includes performing 3) _____ actions which keep the device in working order (known as scheduled maintenance) or prevent 4) _____ from arising (preventive maintenance). MRO can be categorized by whether the product remains the property of the customer (i.e. a service is being offered), or whether the product is bought by the reprocessing organization and sold to any customer wishing to make the purchase. In the former case it may be a back-shop operation within a larger organization or smaller operation. The former of these represents a closed loop 5) _____ and usually has the scope of maintenance, repair, or 6) _____ of the product. The latter of the categorizations is an open loop supply chain and is typified by refurbishment and remanufacture. The main characteristic of the closed loop system is that the 7) _____ for a product is matched with the supply of a used product. Neglecting asset write-offs and exceptional activities the total population of the product between the customer and the 8) _____ remains constant. Preventive maintenance is maintenance performed in an attempt to avoid 9) _____, unnecessary production loss and safety 10) _____.

5. Complete the gaps with the correct form of the verb in brackets. (5pts)

1. If the air pressure _____ (change), I always get a headache.
